3D, Smart TV and outstanding value – Toshiba introduces the TL Series

- **TL series provides 3D experience alongside exceptional value**
- **Full HD (1080p) resolution displays stunning quality images and Toshiba Places offers access to exciting online services**
- **New acetrax® and Facebook™ services lets viewers watch their favourite content and connect with friends**

Berlin, Germany, 1st September 2011 – Toshiba UK today announces the launch of the TL Series – a range of stylish, Full HD 3D LED TVs providing excellent performance alongside outstanding value. Combining imaging technology with a selection of Smart TV features, the TL series is the perfect option for those wanting to add a new dimension to their home entertainment experience – providing exceptional 3D performance without breaking the bank.

Available in 101.6cm (40'') or 116.8cm (46'') screen sizes, the TL series has been designed to recreate a fun and immersive experience at home. Full HD (1080p) resolution and LED backlighting combine to provide a vivid viewing experience when enjoying both 2D and 3D content. Whether displaying action scenes in blockbuster 3D movies, or car chases in the latest 3D games, the TL series offers truly accomplished performance, with a 200 frames per second (fps) refresh rate ensuring smooth motion and performance at all times.

Content on demand: Smart TV for all the family

As well as great value access to 3D in the home, the TL series comes with a selection of additional features. An integrated digital TV tuner offers access to the latest range of Freeview HD[1] channels – increasing the amount of HD viewing content users can enjoy.

Integrated YouTube™, BBC iPlayer, and Flickr®[2] applications provide instant access to online content on demand, while Toshiba Places offers a one-stop portal that allows users to enjoy additional online entertainment services and content. Toshiba Places now includes newly-added applications from acetrax® and Facebook™, allowing users to access blockbuster movies and connect with friends via an interface optimised for TVs, from the comfort of the sofa.

Enhanced connectivity

A wide range of connectivity options provides users with exceptional flexibility. The TL series supports wireless internet access via an additional dongle, and four HDMI ports allow users to hook up to a range of external high definition devices, including Blu-ray™ players or the latest HD games consoles.

USB connectivity also allows users to access, playback and enjoy images, audio and movies directly from USB sticks. DLNA® compatibility supports content streaming across home networks, allowing users to wirelessly display photos and videos stored on other DLNA®-compatible devices, including laptop computers and tablet PCs.

The new RL858 series – Full HD performance with smart features

In addition to the TL series, Toshiba today also announces the RL858 series, a stylish range of Full HD LED TVs offering high quality performance. The RL858 series offers a range of ways to enjoy home entertainment content from a variety of sources. A Freeview HD[1] digital tuner provides instant access to terrestrially-broadcast HD content[3], while internet connectivity provides easy access to a range of online entertainment from acetrax®,

Facebook™, Flickr® and more via Toshiba Places. Additional content from integrated YouTube™ and BBC iPlayer apps can be enjoyed at the touch of a button. Designed to seamlessly fit into any living room, a brushed silver finish adorns the RL858 series, ensuring great performance and style go hand-in-hand.
