

**Super power, super style – introducing the Qosmio DX730,
Toshiba's first all-in-one PC**

- **Qosmio DX730 combines powerful performance with space-saving design**
- **58.4cm (23") Full HD touchscreen display provides exceptional detail and control**
- **Integrated Blu-ray™, Freeview and Onkyo® speakers provide leading multimedia performance**

Berlin, Germany, 1st September 2011 – Toshiba UK today announces the launch of its first all-in-one PC, the Qosmio DX730 – a powerful and highly stylish entertainment centre with touchscreen control. The perfect choice for multimedia enthusiasts who want high power from a versatile machine, the Qosmio DX730 succeeds in providing fast performance in a super stylish, highly-compact design inspired by Toshiba REGZA TVs.

Powered by the latest-generation of Intel® processors, the Qosmio DX730 is capable of exceptional levels of performance. Up to 6GB of memory provides the power to run demanding programmes simultaneously, such as HD video content or process-heavy image or video editing suites. Spacious HDD storage up to 1TB also offers a huge amount of space for saving numerous HD video files, music libraries, and large directories of digital images.

Super smart performance

Designed to be both powerful and easy-to-use, the Qosmio DX730 combines a next-generation touchscreen interface with wireless keyboard and mouse control. Multi-touch screen support gives users a more interactive way of using their computer, making scrolling through webpages and menus quick and easy, while the wireless keyboard and mouse

provide additional flexibility by removing the restriction of wires – enabling users to interact with their PC while moving around a room, for example.

The 58.4cm (23”) Full HD display is perfect for high definition gaming, and an integrated Blu-ray™ drive on selected models means users can enjoy the latest blockbuster movies in rich detail, combining with an LED backlight to deliver stunning clarity. Resolution+ picture processing technology, originally developed for Toshiba’s REGZA television range, enhances standard definition video images by adjusting colour, brightness and contrast to deliver undeniably impressive picture quality, whatever the content.

The ultimate entertainment centre

A range of additional features make the Qosmio DX730 ideal for the most demanding of users. Doubling as a small screen television, built-in Freeview support lets users enjoy a wide range of digital television channels, without the need for a set-top box or satellite dish. In addition to optional Blu-ray™ support, it also comes complete with a 1.3MP webcam, as well as a comprehensive set of connectivity ports. Four USB 2.0 inputs are ideal for connecting to smartphones or media players, while two additional USB 3.0 ports provide super-fast file transfers between compatible devices. The inclusion of an HDMI®-In port also means the machine doubles as a Full HD screen – providing direct access to HD games consoles or HD set-top boxes.

Exceptional audio

The Qosmio DX730 also comes equipped with excellent audio capabilities, with stereo speakers and a powerful subwoofer, designed by audio-specialist Onkyo®, built-in as standard. Dolby® Advanced Audio™ processing guarantees audio tracks are rich, clear and distortion-free, and pre-loaded Sound Machine software provides a comprehensive suite of audio features to ensure users get the best possible quality from all audio sources. Toshiba Sleep-and-Music also lets users connect an MP3 player to the PC and play music through the speakers – even when the machine is switched off.
