**Hi-Speed Port Replicator 2**

- **New 15.6" LCD Monitor offers mobile convenience and flexibility**
- **Toshiba Dynadock™ U3.0 offers versatile, universal connectivity options**
- **Hi-Speed Port Replicator 2 provides instant access to desktop devices**

**London, UK, 7<sup>th</sup> March 2012** – Toshiba UK today announces a new range of business accessories designed for professionals who require complete convenience, whether working in the office, at home, or on the road. The new collection includes the **39.6cm (15.6") USB LCD Mobile Monitor**, a portable LCD monitor that acts as an additional screen for use in the office and during meetings, the **Dynadock™ U3.0**, a compact universal docking station offering a range of versatile connectivity options and the **Hi-Speed Port Replicator 2** – an all-in-one docking solution for Toshiba laptops, providing easy and instant access to everyday office devices.

**39.6cm (15.6") USB LCD Mobile Monitor – flexibility for professionals**

Perfect for professionals who frequently conduct presentations to groups, or those with a need to conveniently expand their screen space, the new 39.6cm (15.6") USB LCD Mobile Monitor is a highly portable mobile display that provides great flexibility for those who work on the move.

A 1366x768-pixel HD screen resolution provides sharp on-screen detail, while the 39.6cm (15.6") screen size is perfect for conducting presentations to groups when out of the office. A range of different viewing modes provides additional flexibility to use the monitor in a number of different ways – for example, users can set the monitor to mirror their laptop screen, expand their personal working space by creating a dual-screen set-up, or set the screen to display different content for the presenter and audience during presentations. Video playback is supported thanks to DisplayLink™ technology, allowing the LCD to be used in multimedia presentations.

Powered by USB 2.0 or 3.0, the screen removes the need for carrying power leads, while the slim and lightweight design ensures it can be easily carried whilst working out of the office. A smart, integrated carry case provides protection against knocks and bumps, and also doubles-up as an adjustable stand.

The USB LCD 39.6cm (15.6") Mobile Monitor will be available from Q2 2012.

**Dynadock™ U3.0 – the smart and powerful docking solution**

Designed to save space and eliminate wires from the desk, the Dynadock™ U3.0 universal docking station offers simultaneous connections to a range of peripheral devices, making it perfect for anyone looking to expand their connectivity options – whether in an office, or working from home.

Connected to a laptop through a single USB, the Dynadock™ U3.0 houses multiple connections, including no fewer than six USB ports – four of which are high-speed USB 3.0 – featuring USB Sleep-and-Charge technology for charging mobile devices. Ideal for those who like to multitask, users can connect to up to two additional monitors using DVI or an HDMI input, which offers high-definition video output in 1920x1080p Full HD resolution. Gigabit LAN support also lets users plug-in to their office network, and the versatile collection of audio inputs includes connectivity options for microphones, headphones and even stereo jacks for 5.1 surround sound.

The Dynadock™ U3.0 is priced at £108 TPP ex VAT, and will be available from Q2 2012.

**Hi-Speed Port Replicator 2 – instant connectivity for laptops**

Toshiba's new Hi-Speed Port Replicator 2 is a docking station that removes the hassle of individually connecting multiple wires to a laptop computer with one, convenient docking solution. It's compatible with Toshiba's range of business laptops, and enables users to instantly disconnect and re-connect to all peripheral devices in one go – ideal for busy professionals who need to take their laptop into meetings.

Six USB inputs include two ports featuring USB 3.0 support, offering super-fast data transfers to and from external devices. A 1 Gigabit Ethernet LAN connection offers instant access to office networks, while a choice of VGA, Display Port or HDMI provides an instant connection to additional displays, with 1080p video support. A choice of audio connections also lets users connect to headphones, microphones and speakers.

The Hi-Speed Port Replicator 2 is priced at £145 TPP ex VAT and is available now.
