

## Next level multimedia performance with the Satellite P series – the premium home entertainment laptop range from Toshiba

- Turbo-charged processing power and next-gen graphics
- High definition, glasses-free 3D screen<sup>i</sup> and integrated Blu-ray™ drive<sup>ii</sup>
- Harman Kardon™ speakers and SRS Premium Sound 3D provide supreme audio

London, UK, 7<sup>th</sup> March 2012 – Toshiba UK today unveils the launch of the new Satellite P series – a premium collection of multimedia laptops built to provide raw power and lightning-fast performance. Comprising four models, the new P series features the latest generation of processors, dedicated graphics and optional glasses-free 3D support – all packed into a sleek, stylish design.

The ideal choice for home entertainment enthusiasts looking for enough power to handle demanding multimedia applications, the Satellite P series features two 36.9cm (15.6”) models, the **Satellite P850** and the **Satellite P855**, available with an incredible glasses-free 3D screen. Two 43.9cm (17.3”) options, the **Satellite P875** and **Satellite P870** offer ideal options for those requiring a powerful laptop with a large screen, such as designers, photographers and entertainment enthusiasts.

### Raw power, next generation performance

The latest Intel® processors, dedicated NVIDIA® graphics and incredible memory capacity combine to provide a truly state-of-the-art computing experience. Each P series model supports DDR3 memory, making light work of demanding tasks such as video, audio or image editing programs – all at the same time.

### Home entertainment, anywhere

An HD screen and Blu-ray™ support allows users to view the latest high-definition films, displaying incredible images that don't compromise on detail, sharpness or clarity. LED backlighting on each screen also ensures colours are accurate, with sharp contrasts between dark blacks and pure whites – perfect for video playback or viewing photographs.

For those looking for next generation multimedia performance, selected Satellite P855 models are available with glasses-free 3D playback – allowing users to enjoy the latest 3D films with no barriers as well as viewing 2D and 3D content simultaneously. Using advanced Toshiba technologies, each model uses a lenticular screen that sends individual images to each eye, creating the illusion of 3D depth in every frame. An integrated webcam tracks the position of the viewer's face and adjusts the 3D image accordingly, ensuring an optimum viewing experience is maintained – even if the viewer moves their head or adjusts their position.

A selection of advanced features on the Satellite P series makes it easy to play content from the laptop on a bigger screen – perfect for enjoying movies in the living room, or playing multiplayer games with friends. Using an HDMI® port, amazing 3D visuals can easily be played on any 3D TV connected to the new Satellite P series laptops. Intel® Wireless Display<sup>iii</sup> also makes it possible to wirelessly stream media saved on the laptop to connected TVs – letting users enjoy digital photo albums, videos or music on a big screen from the comfort of the living room.

Exceptional visuals are complemented by first-class audio, with integrated stereo speakers designed by specialists Harman Kardon® combining with SRS Premium 3D sound enhancement technology to deliver impressive audio performance. Slip Stream technology ensures distortion from bass frequencies is kept to a minimum even at high volumes, ensuring MP3s, video soundtracks and dialogue are rich, dynamic and immersive. Toshiba's Sleep-and-Music feature also lets users enjoy music on each laptop's speakers from MP3 players or smartphones, even when the laptop is in sleep mode.

The Satellite P series is available with up to 1TB hard disk space for incredible storage capacity – ideal for vast music collections, huge digital photo libraries and hundreds of high definition videos. A Hybrid Drive is also available on select models, combining a 750GB hard drive with an additional 8GB solid state capacity, enabling faster booting times and saving energy by reducing the need for a moving part. Four USB 3.0 ports provide extensive connectivity options, and transfer speeds between compatible devices up to ten times faster than USB 2.0 – perfect for transferring large photo collections, HD videos, entire games or music libraries instantly.

The Satellite P series will be available from Q2 2012.

#### **Satellite P series details**

- Latest Intel® processors
- Next generation NVIDIA® GPUs
- Glasses-free 3D screen (selected Satellite P855 models only)
- Up to 1TB hard drive or 750GB/8GB hybrid drive
