

SECURING THE FUTURE OF A SMART WORLD

According to a new survey by A10 Networks and the Business Performance Innovation (BPI) Network, mobile service providers anticipate significant new revenue opportunities from the coming deployment of high-speed 5G networks and a host of new IoT-driven use cases, but they also believe much-improved security will be essential to realizing that potential.

MOBILE OPERATORS ARE MOVING DECISIVELY TOWARD 5G

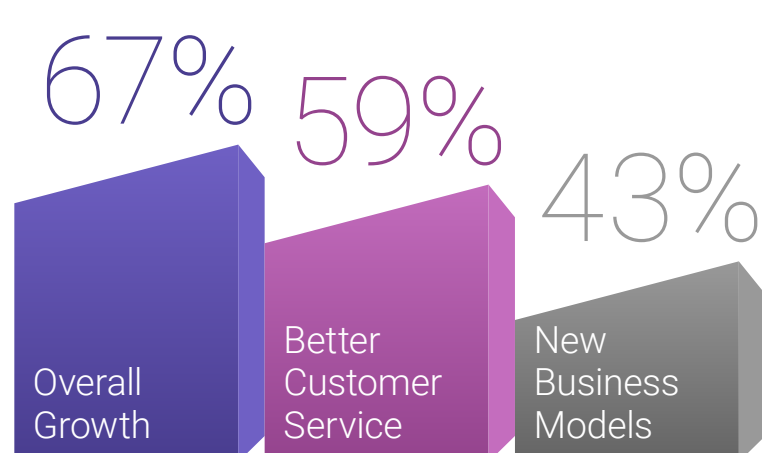

Two-thirds of mobile operator respondents say their companies will implement commercial networks within 18 months, with another 21 percent saying commercialization will occur within two years.

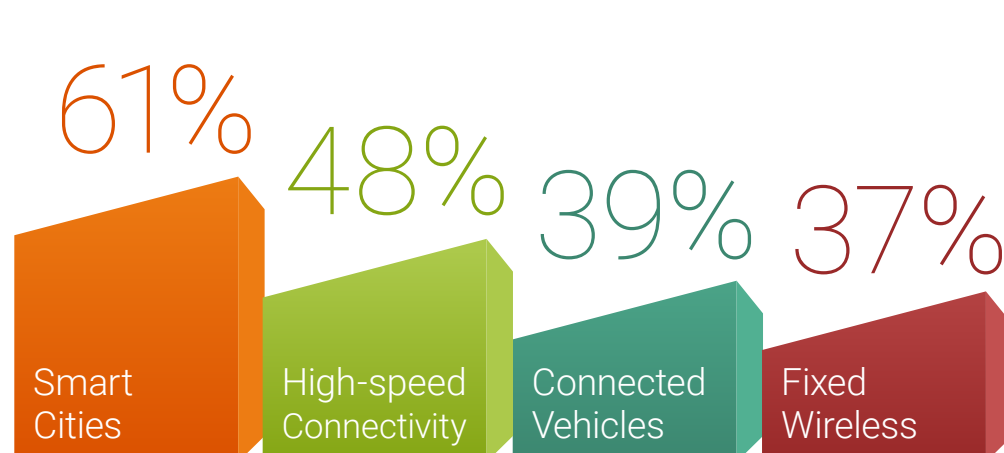

96 percent say 5G is a consideration in their current technology decision-making
