

Illumineye DS Suite
vxl software

Product overview

A complete digital signage solution

Illumineye DS Suite

vxl software

Create

using Illumineye Creator

Illumineye Creator is a Windows-based application which allows you to design your digital signage. It's been developed with people like you in mind – you don't need to be a professional graphic designer to use it. And yet, Illumineye Creator is very powerful – able to incorporate just about any kind of media into your digital signage (including video, images, text, audio, tickers, RSS feeds, plus feeds from webcams and live television, QR codes, Office documents, Adobe Flash files – and more). Arranging your content is easy, using a choice of professional landscape, portrait templates and component styles – and you can quickly apply advanced formatting options, such as shadow, transparency, rotation and reflection.

Schedule and manage

using Illumineye DS Manager

Your Illumineye digital displays are driven by powerful, low-cost, energy-efficient thin-client hardware – which is controlled remotely via the included Illumineye DS Manager software. You can schedule content to be displayed at specific times, with defined intervals, repetitions and much more – and, of course, roll out changes with ease. In addition to all this, you can generate reports detailing playlist approvals and more.

Play

using Illumineye Player

Illumineye's dedicated software player displays your content on the screen panels of your choice (we don't force you to buy our display hardware). Illumineye Player is built to integrate with Illumineye Creator and Illumineye DS Manager – working together, they deliver a powerful, complete, digital signage solution.

A complete digital signage solution – from creation to display

Displaying up-to-date information is a key requirement for many businesses. Yet too many digital display systems are expensive, incomplete or require professional skills. Illumineye, from VXL Software, is a complete digital signage solution that's inexpensive, powerful and very easy to use. Illumineye is ideal for retail stores, airports, restaurants, leisure centres, hospitals, filling stations and many other uses. It's even perfect for smaller businesses – such as displaying sales or support statistics.

Benefits

- A complete digital signage solution – no hidden extras – the only things not included are the displays (which we can optionally supply)
- Creative control of content layout
- Great for companies both large and small
- A wide range of applications
- Low-cost, energy-efficient, powerful thin-client hardware – as powerful as a PC but cheaper, more secure and draws far less power

Component types Illumineye Player can manage include:

- Adobe Flash
- Audio
- Countdown timer and date/time
- Container (region of mixed components)
- Documents (presentations, Word documents and PDFs)
- HTML
- Images
- Live television
- QR codes
- RSS feeds (ticker and list view)
- Tables
- Text
- Tickers
- Twitter feeds (ticker and list view)
- Video
- Weather feeds using a variety of styles
- Webcam feeds
- Interactive buttons

Illumineye Creator features include:

- Picking data from external sources (such as text, spreadsheets, etc)
- Adding shadow, transparency, rotation, reflection, and mirror for most media components
- Transition effect for images and documents
- Supports most common file formats for audio, video and images
- Landscape and portrait modes
- Default templates and ready to use components

for quick creation

- Maker-checker functionality
- Part-selection of video and audio
- Mute selected video and audio
- Previewing playlists

Illumineye Player's features include:

- Bluecasting (Bluetooth broadcasting of images, video, audio and text)
- Displaying emergency text announcements and campaigns
- Option to play default campaign or image when no schedule available
- Automatic hiding of components when no content available
- Encrypted transfer of content, schedules, playlists and logs
- Intelligent downloading of media
- Interactive campaigns
- Video wall displays
- Uploading Illumineye Player screenshots at regular intervals
- Playing selected media in fullscreen mode

Illumineye DS Manager features include:

- Proof-of-play logs and a range of reports
- Centralised management and scheduling of all displays/players
- Powerful scheduling at defined intervals, including specific time, repetitions, etc
- Scheduling emergency & default campaigns
- Approving playlists for scheduling
- External link generation to view playlist for approval by stake holders
- Elapsed / unused media cleanup from players
- Option to override schedules
- Option to stop & restart playlist on player
